# BKeeping
## MODULE

- ## PD Cheques Management

  Manages post-dated cheques, tracking their due dates, and ensuring they are processed on time, minimizing the risk of bounced cheques.

- ## Chart of Accounts

  Organizes all financial accounts in a structured format, providing a comprehensive view of the company's financial health and enabling accurate reporting.

- ## Journals

  Records all financial transactions in chronological order, serving as the initial entry point before they are posted to the ledger.

- ## Petty Cash Vouchers

  Manages small, everyday expenses by issuing and tracking vouchers for petty cash transactions, ensuring proper accounting and reimbursement.

- ## Profit & Loss (P&L) Statement

  Summarizes the company's revenues and expenses over a specific period, providing insights into profitability.

- ## Balance Sheet

  Provides a snapshot of the company's financial position at a given moment, detailing assets, liabilities, and equity.

- ## Trial Balance

  A report that lists the balances of all ledger accounts, ensuring that total debits equal total credits, which is crucial for accurate financial reporting.

- ## Shareholder Balance

  **Tracks the equity holdings of shareholders, reflecting their share of ownership in the company and any changes over time.**

- ## Tax Reports

  **Generates reports required for tax filing, including calculations of taxes owed, ensuring compliance with tax regulations.**

# BMaker
## MODULE

- **Production Efficiency**

  Measures and monitors the effectiveness of the production process by comparing the actual output against the potential output, helping to identify areas for improvement.

- **BOM (Bill of Materials)**

  A detailed list of all materials, components, and assemblies required to produce a finished product, serving as a crucial reference for manufacturing and cost estimation.

- **Job Cards**

  Documents that provide detailed instructions for specific production tasks, including materials, labor, and time requirements, ensuring that each job is completed accurately and efficiently.

# BHR
## MODULE

- ## Employee Salary Setup with EPF/ETF

  Configures employee salaries, including automatic calculations for Employee Provident Fund (EPF) and Employee Trust Fund (ETF) contributions, ensuring compliance with statutory requirements.

- ## Single Shift/Rotation Shift

  Manages employee work schedules, allowing for both single shifts (fixed schedules) and rotation shifts (varying schedules), helping optimize workforce management.

- ## Fingerprint Setup

  Integrates fingerprint scanning systems for accurate and efficient employee attendance tracking, reducing manual errors and enhancing security.

- ## Leaves

  Tracks employee leave balances, requests, and approvals, ensuring proper leave management and adherence to company policies.

- ## Allowances

  Manages various allowances, such as travel, housing, or meal allowances, which are added to employees' salaries based on eligibility.

- ## Deductions

  Handles various deductions, such as tax, loan repayments, or other statutory deductions, which are subtracted from employees' salaries.

- ## Incentives

  Manages performance-based incentives, including bonuses or commissions, rewarding employees for achieving specific targets or goals.

- **Earnings**

  Tracks all forms of employee earnings, including base salary, overtime, incentives, and other compensations, providing a comprehensive view of total earnings.

- **Pay Sheets**

  Generates detailed payslips or pay sheets for employees, summarizing earnings, deductions, and net pay, ensuring transparency and accuracy in payroll processing.

# BFuel
## MODULE

- ## Pumper Schedule

  Manages the work schedules for fuel pump attendants, ensuring that staffing levels are adequate during different shifts to meet customer demand.

- ## Pump Meter Reading

  Tracks the readings from fuel pumps to monitor the amount of fuel dispensed, helping to ensure accurate billing and inventory management.

- ## Cash/Card Credit Fuel Sale

  Handles transactions for fuel sales, whether paid by cash, card, or on credit, ensuring accurate recording of sales and streamlining payment processing.

- ## Pump Testing

  Regularly checks the accuracy and functionality of fuel pumps through testing procedures, ensuring compliance with regulatory standards and preventing fuel loss.

- ## Realtime Fuel Level

  Monitors the current fuel levels in storage tanks in real-time, providing up-to-date information to manage inventory and prevent stockouts.

- ## Fuel Level History for Each Tank

  Keeps a historical record of fuel levels in each storage tank, enabling trend analysis, inventory audits, and identification of potential leaks or discrepancies.

# WAITERMART
## MODULE

- ### Smartwatch Integration

  Provides waiters with smartwatches that receive real-time notifications of customer orders, ensuring prompt service and reducing wait times.

- ### QR Code Table Assignment

  Each table is equipped with a unique QR code that customers can scan to access the menu and place orders directly from their devices, streamlining the ordering process.

- ### Customer Self-Ordering

  Empowers customers to browse the menu, customize their orders, and submit them without needing to wait for a waiter, enhancing the dining experience.

- ## Order Accuracy

  Reduces errors in order taking by automating the process, ensuring that customer preferences and requests are accurately communicated to the kitchen.

- ## Efficient Workflow

  Optimizes the workflow in the restaurant by integrating the ordering, kitchen, and service processes, leading to faster service and higher customer satisfaction.

# BLeaf
## MODULE

Optimized for tea factories, the system handles supplier collections, weighments, exports, Bluetooth scales, Android app integration, SMS-enabled leaf cards, supplier loans, and retail shop links for leaf balance purchases
